BRECKENRIDGE NEWS.

WEDNESDAY, OCTOBER 11, 1893.

TORNADO SWEPT,

TERRIFIC WIND AND RAIN STORM IN THE SOUTH.

Scores of Lives Lost and Much Property Destroyed.

New Orleans, La., Oct. 2.—A terrific tornado struck New Orleans late last night, coming from the northeast, and raged here all night and a portion of today, sweeping south from here along the line of the Mississippi River through the Parish of Plaquemine to the Gulf.

The storm was one of the worst which ever visited that section of the far as can be known, killing 21 or more persons and wounded probably three times as many, some of them fatally, besides destroying a large amount of property at New Orleans.

The wind had reached a velocity of 48 miles an hour at 8 o'clock when the anemometer of the Weather Bureau was destroyed.

persons and several children are known to have been killed in Pointe à la Hache, but how many children is not exactly known.

Among the killed are:

Mr. Leon La Franche, wife of one of the principal merchants of the town.

Mr. E. Lavenders, wife of a prominent lawyer.

MANY OTHER DEATHS REPORTED.

In the immediate vicinity of Pointe à la Hache there are other deaths reported and 15 others in the parish. It is not known exactly how many were killed.

The crop losses reported are:

FRUITFUL HORRORS OVERCAST.

It is reported that several thousand houses on the coast of the Gulf Island, where 286 people lost their lives, and at Johnston's Bayou the loss numbered 229 six years ago, but Monday's disaster far surpassed this in horror.

The news has come in slowly. Mon-

day it was known that the storm had been very destructive in Plaquemine, and that 100 houses had been destroyed, as high as 35. Tuesday the news came of the destruction of the Bayou Settlement and the deaths were thought to be as many as 250. Yesterday came in quick succession the news of the disaster at Chenee Cananada, the largest fishing village on the Gulf coast, at Grand Isle and other points and the mortality was now estimated at 2,000. It will probably exceed this figure when the full record is made up.

The deaths are confined to two parishes,

Plaquemine and Jefferson, and are more than one-fourth of the total white population.

The dead wounded and property annihilated is the record of the great Gulf storm in Louisiana.

There has never been anything approximating it since the country was settled.

More than half the hurricane in the region over which the hurricane swept is dead.

Everything is wrecked and not one house in ten is left standing while the survivors are left in the most desolate condition, without food or clothing for most of them were sleeping in their beds when their houses were crushed by the wind or the waves.

More than a dozen relief expeditions went down from New Orleans yesterday to the stricken region, and the number of whom had had nothing to eat since Monday, and to-day an appeal was made to Collector of Customs Wilkinson to let the revenue vessels pick up the survivors or carry aid to him.

OVER 1,800 KNOWN TO BE DEAD.

The known death list is already above 1,800, and the number is increasing while the devastated country. It is such a state of islands, bayous, lakes and swamps that it will be a week before the relief boats can traverse all the water way and discover the full extent of the damage done. The worst, however, is known to all the larger settlements, and the worst of the damage is in the fishing towns were Creoles, Italians, Spaniards and so-called Austrians or Dalmatians. A large proportion of them were engaged in fishing and owned boats.

NOT A HOME ESCAPED.

Portions of a town of 1,000 people, was the worst sufferer. In that town not a single house escaped injury. The court-house and Catholic church, the principal buildings in the town, and some 20 other buildings, were destroyed and the situation was so threatening that the greater portion of the people, fearing being crushed to death in their buildings, camped out in the street all night in a heavy rain.

The air was filled with debris, and the wind blew so fiercely that many had to shield themselves against trees to prevent being blown away. Four grown

men were killed in the gulf fishing.

Along the Mississippi the loss of life was to some extent due to falling buildings.

In Barataria Bay it was caused by drowning.

The Mississippi rose 9 feet and poured over the levees. The Gulf rose 15 feet and between these two floods everything was washed away or destroyed.

Along the coast of the Gulf the greatest loss of life occurred, in a fishing town of 1,610 people, situated on the main land of Louisiana, opposite Grand Isle. It was supposed to be the safest place on the Gulf Coast, but the fury of the storm raised the water in the bay back of it 15 feet and overleveled every house in the town. With a sweep of 8 to 10 miles an hour it swept everything before it and of the 310 houses on the settlement only three were standing at sunrise Monday. The survivors were secured by clinging to trees or poles.

Most of the bodies were carried to sea, but those that were found were buried in trenches, it being impossible to obtain coffins.

DESTITUTION ABROAD.

Throughout all the storm-visited section the majority of the people are in great destitution, many of them being without food or clothing. The condition in the night when they were discovered, and they have been in that condition ever since. It had rained all night and the wind was quite strong, but no one anticipated a storm. It was after midnight when the hurricane broke, and it was so sudden that the people were unable to get away. It was impossible to run to the houses of 10 to 15 miles away, and husbands and wives stood at their door-necks in the water all night clinging to trees and only a few feet apart. It was necessary to leave the water and wade up to the levee when the sea backed up and rushed over the levee, and the water was up to the chin. The tide was then started out like a millrace, carrying most of the bodies to shore.

PORTS DESTROYED.

At Fort St. Philip the guns were dismounted. Fort Livingston, in Barataria, one of the most heavily constructed forts in the world, was completely destroyed.

Nothing is left but the lightest of posts.

Two houses are standing at Barataria, and none at Bohemia. Of the 300 people living in or around Bayou Cook only 23 are accounted for or have reported.

PEOPLE DROWNED.

These towns and settlements extend along the Mississippi from Pointe à la Hache, 45 miles below New Orleans, to the Gulf on Bayou Barataria and the oyster reefs between there and the mouth of the Mississippi and the islands stretching from the Mississippi to the Gulf.

Chenee Cananada, Bayou St. Louis and Pearl River are in Mississippi.

The great majority of people are whites and not over 100 are colored. At Chenee Cananada was a large Chinese colony engaged in preparing and exporting shrimp to China. St. Malo was settled by Maylays or Malas, who came in 1750. Some 200 families of this population in the fishing towns were Creoles, Italians, Spaniards and so-called Austrians or Dalmatians. A large proportion of them were engaged in fishing and owned boats.

120 FISHING VESSELS LOST.

At the time the storm visited Chenee

Cananada, 129 fishing vessels were in the gulf fishing. Not a word has since been heard from them or their occupants.

"Certainly."

"What for—so as to be with her?"

"So as to get home and attend to my business," Bruce replied, availing the lesson.

The girl averted her hair out of her eyes with a wistful, impudent movement and leered at her friend with a sly look.

"Then she has nothing to do with him?" she said with a look of relief.

"She will be in the party, of course, but she will be a mere spectator," he replied, truthfully enough.

Cynthia was silent, apparently thinking.

"You'll come and see me again?" she said at length and hard riding, the small stature of the first speaker, his heavy mustache, and his broad, well-set features.

"She is a man of the world," he said.

"She will be in the party, of course, but she will be a mere spectator," he replied, truthfully enough.

Bruce overheard the inference.

"When you are in such a remarkable affair come to me," he implored.

"About the close of the spring 'roundup'—several weeks off, yet," she replied, looking at him fixedly and twisting the ends of her hair in a way that must have been torture.

"Cynthia," said Bruce, leaning toward her and looking into her eyes. "I want you to be my partner. Will you be my partner that can take you anywhere. You must know, from what your father says, that his company is not creditable to any young woman—much less you."

The girl looked down at the lawn.

"Say you'll take me, and I'll be your partner."

"I have already—conditionally," Bruce replied.

"I know that," said Cynthia, "but I want you to my partner. Will you be my partner that can take you anywhere."

Cynthia was silent, apparently thinking.

"Not at all," Bruce answered, "but business must be present."

"I am not selling you," he said.

The girl averted her eyes out of her eyes with a sudden impulsive movement and leveled her brows full upon him.

"What are you going to do with her?" she said, with a look of relief.

"She will be in the party, of course, but that is not the reason of my departure," he replied, truthfully enough.

Cynthia was silent, apparently thinking.

"Well I come and see me again!" she said at length.

"I will come if you wish it."

"I do," she replied frankly.

Both were silent.

"Henry Bruce," Cynthia said at last, lifting her eyes from him with a pleasant earnestness. "There's going to be a ball over at San Marcos this evening, and I want to you take me. Will you go?"

"I guess so," the young man replied differently. "That is, if nothing happens to prevent. Have you no other escort?"

"Cynthia is here."

"I never saw the time yet I had to go round begging," she replied tartly.

"Captain Foraker, I reckon, is glad enough to get the chance. He's very good-looking."

Bruce overlooked the inference.

"When is this remarkable affair to come off?" he inquired.

"The first of the spring round-ups—several weeks off," she replied, looking at him fixedly and twisting the antelope's coat a way that must have bothered him.

"Cynthia," said Bruce, leaning toward her and looking into her eyes. "I want you to promise me that you won't let that man take you away."

"I'll tell him what my father said, that his company is not creditable to any young woman—much less yourself."

The girl looked down at the lawn.

"Say you'll take me, and I will," she stipulated.

"I have already—conditionally," Bruce replied.

"I know that," said Cynthia, "but I don't want any hangin' fire. Are you thinkin' of takin' that dark girl?" she demanded.

"Not at all," Bruce answered, "but business might prevent. I may be at the Post selling my wool. I might be kickin' around things might happen."

"Very well," said Cynthia, rising with decision, "I'll be back at the ranch with a disappointed look."

"Neither can I. I reckon I hear your head comin' in like a bell," he said with a quirk of his eye.

And calling to Aulus and the antelope she whisked himself out of the power.

He had the same feeling of discomfiture. He had the wistful face of Miss Dallas sincerely at heart.

He had decided to warn her against the attentions of Captain Foraker, of whose indiscretions he had heard. But he had been too long been aware. But he had met with rebuff and was naturally chagrined.

He had his compassions mounted and impatiently awaiting him. Phil Kerchoch was holding the bridle rein of a small sorrel pony already saddled for the post.

Bruce delayed only to shake the horrid head of his host and wave a farewell to the etony Anselia, who was standing in the doorway of the quarters. Cynthia was nowhere to be seen, slipping into the stirrups of the sorrel, he rode away with the rest, lost in his gloomy reflections.

He rode a hundred yards from the house when seemed to him to be the long chirrup of a ground squirrel caused him to look up in his face in the rear of the castle.

They were just passing a pile of rocks on the crest of a western divide. On the topmost pinnacle of this natural elevation caught a single ray of Cynthia's smile as she gazed, robes and arms thrown about each of her inseparable companions. A light breeze stirred the delicate hair of the girls, and while she had not been able to take the turn to rearrange, she smiled down upon her serenely from the immeasurable height. Bruce waved her a parting greeting, and as he did so, he saw her head forward and gaily and with the very tips of her little fingers fling him a dainty kiss.

CHAPTER VII.

A trio of mounted men rode up to the Mosquito valley ranch. They were dusty and travel-worn, the two younger brothers, a stalwart and a sleek, with the foam of hard riding. At the ranch gate they halted, and the central figure of the group a small man with a sloping chest and a broad face, with his distinguishing features and wiped the perspiration from his high forehead.

"By the Lord!" he exclaimed, dashing a hand, and then across his eyes with a hand, impaled a bullet with the foam of hard riding. "What is this to day?"

He was a tall, thin man with the "tame" look of a horse that has been tamed, as if it had been a feather. The other caught it deftly.

"'Ah—ah!" ejaculated the first speaker, clutching his chest after throwing his head back and partaking freely of its contents, "that stink takes hold whether it's damage or otherwise. I feel fresh as a daisy." Henry Jim will you irrigate?"

The third party, addressed by this uncomplimentary title, exhibited the usual admiring admiration, but his slouching jacket, a large top coat, composed known on the frontier as a "silent conqueror" and tossed it to his comrade. He was a big, muscular man of the frontier type, but he flushed the face him as if it had been a feather. The other caught it deftly.

This commanded, the individual addressed—Mr. Jack Sharp of the "Silent Conqueror"—strode across the room, his slouching jacket, a large top coat, composed known on the frontier as a "silent conqueror" and tossed it to his comrade. He was not a prepossessing object. His long hair was down upon his coat collar. His beard was straggling and unshorn, and his nose was gone—that is to say, the nostrils were there, but only in the shape of two small holes in his nose, which were to his nose as the nostrils to his mouth.

Despite the disorder of his dress, one dust and hard riding, the small assault of the first speaker, his heavy mustache, bald forehead, and nervous manner received Sheriff Mosley in Calakoo. He blew his fist into his palm, and of his huge mustache and twisted them fiercely as he demanded.

"I reckon we better tip till the sun gets down," he said, "and then we'll be off."

"I ain't well known here, but if that chap Kerchoch is as likely a feller as his partner, Henry Bruce, we won't get no slackin' reception. Ye know, I'm a simpleton, a fool of corn afore ye come to town."

With this considerate suggestion for the welfare of the party, he took a long, limber, and sinuous leap from his saddle, pommel and strode away to the buckling on his holster belt as he went.

The afternoon was stampeder, a pair of Scotch greyhounds raised themselves in the sun from the doorstep and barked at the strangers. The dog who had been a leader of the pack, barking at the fair Kate had also been surprised by the arrival.

"I reckon this subject somewhat, but I'll be back to you," he said, "and I'll be back to you."

"I'll be back to you," he said, "and I'll be back to you."

There are lots of goods in this town. We never saw the fall stocks fuller or more complete. The prices are right too. There is no reason why our merchants shouldn't enjoy a good business. The town and its citizens will be a proper source of advertising. Every merchant in town that has a dollar worth of goods to sell ought to make known the fact. Advertising, and do it in a way that will attract attention abroad. Real live wide-awake merchants have the newspapers and do it successfully. The more firms that do it the more firms can't do it but all can. The columns of the News are open to all. You can talk to them about their business not only in the city but in all the neighboring towns and country around.

October being a month so much to hymn winter Cupid's immovable number of admirers, the following list of names of young men who have been in love recently was verified by the light of his torch on the 4th inst, when at the beau-tiful country home of the bride's parents, near Irvington, Mr. A. H. Newman and Miss Mary E. Washington were united in the holy bonds of wedlock.

Rev. W. H. Williams performed the ceremony in the most impressive manner.

Prompty at half past three the strains of Mendelssohn's wedding march vibrated on the air, the sweet strains of the music according with the subdued light of the chandeliers, the bride and groom marched to the center of the room, where the minister was waiting to receive them.

After the ceremony the bridal chorus, from Lohengrin, was played by the Rev. Grant S. House.

The bride was attired in a travelling dress of Havana brown cloth, carrying a bouquet of beautiful pink roses and ferns and was a vision of loveliness, all radiance and beauty.

The groom was attired in the conventional black, and was apparently conscious of having won a choice prize in his lottery.

Mr. and Mrs. Washington were united in their first meeting to make the day one of great pleasure for the many friends and relatives assembled to do honor to the occasion.

The bridal presents were elegant and numerous to mention. I will only speak of one which by its exquisite beauty of workmanship arrested the attention of all.

It was the handiwork of the bride's aunt Mrs. Jackson Alexander, of Illinois.

The wedding was a success and a happy one.

There is no hard times out here now that they have had for years and that there is a general good feeling among all classes.

The post-master at Tobinport says there is not a day passes but there is

more or less mail for the town.

Woman Suffrage.

GIVE THE WOMEN A CHANCE.

The Heathenism and Brutism

Men is What Keeps the Women Down.

What objection can we offer? What excuse can we give for allowing women to vote? Is it because we think we are, in mind, superior to them? Do we think the *tit* of nature, the maker and ruler of the universe, gave us a superior mind, a superior intelligence to the women? Ah, one can do that think this. No one believes that God made this the last. In the beginning, God created man in his own image, in the image of God created he him; male and female created he them. And God blessed them etc." Now, if God created them equal and blessed them together. Why are we not on an equality to-day? It is because we have wandered afar from the path of virtue, and have become brutes, that they want some one to look up to and ask his noble mind, his superior mind, I almost have said his infinite mind, what I do to please my master. He wants to be boss of his poor, weak wife and children, stand around when he is by. They want to be boss of him, to speak and lauch forth in great glee that the very angles in Heaven have not thought of. But I am digressing. Some one will say what do women know about governmental affairs. What do the men know until they have studied it? There are women in the United States who have voted to know there are, that understand the fundamental rights of the government as well as Cleveland or Harrison or any other man the world has ever seen. The best writers we have on the science of government, have been and are to-day women. Some poor fool will say they haven't intelligently. How do you know they haven't? Give them a chance, educate them, let them know they have a right to help make the laws, and you would soon see what they would do. Read ancient history and you will soon learn that the best governments in the world had been those headed by the women. Look at any one of the best kingdoms we ever saw. A much better government than any that was ever ruled by a king.

Not enough, yet, the Irish, German, French, Italian or the Chinese that have been here but two or three days to date. And we have not have sense enough to do. And we have not our own republic have not. What is the best sign of a strong mind? It is having patience. Franklin once said that a woman's patience never tired, and he was in favor of women suffrage. I long to see the day that women will be allowed to vote, so we will have a good government, a good government in his government. We never will until that day comes and the signs of the time go to prove that it is not far in the distance.

Some years ago we were very much subject to severe spells of cholera-morbus, and now when we feel any of the symptoms that usually proceed that ailment, such as sickness at the stomach, diarrhoea and fever, we have but to call upon Dr. Chamberlain's Colic, Cholera and Diarrhoea Remedy. The very thing to strengthen one out in such cases, and always kept it about. We are not writing for a pay-statement, but to let our readers know what is a good thing to keep handy in the house. The Value of Water Works.

The Stanford Interior Journal says: "In mentioning the towns that are without fire protection, the 'Little and About Kentucky' man of the Courier-Journal has omitted the town of Stanford. He does not keep up with the progress. Stanford has had no large fire within the last year, and the several small ones that have occurred have either been extinguished before they did much damage or were not allowed to spread. For fourteen or fifteen months Stanford has enjoyed the best system of water works of any town in the state. The water is good and has a fire company second to none in its promptness and efficiency. Since its experiencing their advantages our citizens would not do without the water works for several times their cost, and each finds himself wondering how we ever got along before their installation. The reduction in insurance rates in individual cases pays the water cost, and the town is solely free to the consumer, who not only enjoys protection, but as the Courier-Journal says, convenience, health and cleanliness."

All that honesty, experience and skill can do to produce a perfect pill, has been employed in making Dr. W. H. Little's Little Elixir. The result is a specific for sick headache, biliousness and constipation. A. R. Fisher, Cloverport, and Witt & Meador, Hardinsburg.

Down Went McGinty.

John W. McGinty, of Derby, Ind., who was elected Township Trustee, and who has the distributing power of the schools was indicted for bribery. Mr. McGinty was caught in the act of auctioneering the several schools to the highest bidder, and it is known he was paid by Mr. George for bribery. We regret very much to learn that Ales Cummings, of the "Derby Game Bird," is on Mr. McGinty's bond. McGinty has skipped—Cannibal telephone.

Read this story of real life.

Tuesday the Allan Line steamer Nebraska arrived in New York, eleven days from Glasgow.

She reported she had on board two fishermen she had found adrift in a drift off the Grand Banks of Newfoundland. These sailors are not imaginary heroes, but are real, interesting to the reader. Captain Abbott, of the steamer Peter, they formed a part of the fishing schooner Poppy which left Catalina, Newfoundland, August 18 on a fishing cruise.

Early on the morning of September 18 they left the schooner to go to visit a buoy a short distance away to which some fishing lines were attached. Now they tell their story as reported in the New York Tribune:

"The five doomed men were arranged side by side, noses adjusted and black caps drawn; then with one pull the trigger the necks of all five were broken. In 15 minutes all were pronounced dead."

Lucien Manuel, Hirundo Jacob and Hirle Brengton, incurred Mr. Alexander Peterson, a merchant of Albany. The murderer was for the purpose of robbery. The murderers were multitudes, and had broken their fast. They hastened their departure, so as to find the boat. Their lights had disappeared, swallowed up in the dense fog that had stolen upon them unperceived. They searched for their ship, and shouted for help, but all was useless.

"When the fog cleared away twelve hours later, they were utterly alone upon the ocean. They had no food, no water, nothing but the sea boat. To add to their peril, the day, an old miser, Neel and Gordon were shooting in a house at another name named Neel and killed Ned's little 5-year-old daughter. The fifth hanging was that of Barse Strickland, for shooting and killing another negro named Loechier, who shot Strickland.

FIVE HANGED AT ONCE.

Seven Thousand People Witness the Executions at Mount Vernon, Ga.

Mount Vernon, Ga., Oct. 2.—An immense concourse of people filled this beautiful ancient Scottish town to-day to witness the execution of five condemned criminals who had recently been sentenced to death in the state prison.

The crowds poured in on every conceivable street, while economic farmers transported their families in roomy country wagons stocked with provisions and camp gear. Camp fires could be discerned over every road leading to Mount Vernon the night previous. It is estimated that over 7,000 people were present.

The five doomed men were arranged side by side, noses adjusted and black caps drawn; then with one pull the trigger the necks of all five were broken. In 15 minutes all were pronounced dead.

Receptor of Receiver Attilla Cox on the Condition of the Road.

Mr. Attilla Cox, who was recently appointed receiver of the Louisville, St. Louis and Texas railroad, issued a general order to all his agents to stop masonry and other attendants, went to this door in solemn procession, and with a golden hammer struck three times, saying, "Open the door, we are here to open the door." The door, called the "Porta Santa," was kept walled up with solid masonry and never opened except to indicate the return of the year of Jubilee.

With a great deal of difficulty, the door was opened, and the lifeless body stretched on the bed was that of his late entertainer. Standing on a table in the room was a picture of his mother, and Father X. was startled and amazed to recognize in her features those of the strange woman who had fledched him to her, the day before—Cardinal American.

The Year of Jubilee.

During the long era when the Jubilee was observed, 15 years ago, that was called in Rome the holy year, and the beginning was on Christmas eve, when the pope opened the large door in front of the church of St. Peter's, Rome. This door, called the "Porta Santa," was kept walled up with solid masonry and never opened except to indicate the return of the year of Jubilee.

With a great deal of difficulty, the door was opened, and the lifeless body stretched on the bed was that of his late entertainer.
